# **Sticky wall – How to maintain and take care of the sticky wall!**

## **How to install and take care of the sticky wall!**

The sticky wall that you have received is pre sprayed and shall last with its glue for at least 2-3 months. We use 3 M Repositionable spray Mount.

### **Instructions For using the sticky wall-**

First task is un-fold it, you will need one persons help with this.

As sticky side is inside and folded one may need to really pull hard to open it.

Once open take it to the wall where you want to place it.

Before hand have masking tape peeled off pieces ready. 4-5 inches.

Ideal tape for securing the sticky wall is Masking tape 2 inches.

First secure both top corners as high as possible - say practically at 7 feet height.

Then center top. Then add as many pieces of tape to the top as needed to hold the sticky wall steady.

Then secure both sides and finally bottom.

**\* Carrying “spray can” in the check-in luggage or hand carry is not allowed during domestic and international air travel!**

# Sticky wall – How to maintain and take care of the sticky wall!

Use colour papers and shapes as per your imagination.

Precautions while sticking papers on sticky wall- Do not attempt to stick with very hard pressure on the sticky wall, ideally just place it gently and gentle pressure would hold the paper on the wall!

You may stick entire flip chart on the sticky wall or laminated cards etc.

## **Rule is DONT PRESS PAPERS HARD ON THE STICKY WALL!**

Also please be mindful about the quality of paper you may use on the sticky wall; substandard papers may leave some of its portion on the sticky wall when you make an attempt to remove it forcefully from the sticky wall!

## **If this happens then -**

Before folding the sticky wall, get a wet cloth and gently rub on the blotches on the sticky wall. With skillful rubbing entire stuck-up remnants can be cleared from the sticky wall!

While removing sticky wall, first remove all side n bottom tapes and in the end top tapes and last one to remove are two top corner tapes.

Ensure when you remove sticky wall it does not touch ground, or else it will catch dust particles.

Never ask hotel staff to remove sticky wall, they may simply pull it off the wall and it may get messy later to fold it! Now secure both ends - imagine at one end with two hands you are holding sticky wall and at other end someone else and the glue sprayed side is up, now bring your both hands together and fold it in half in such a way that sticky side sticks on each other.

# Sticky wall – How to maintain and take care of the sticky wall!

Fold it further and secure it in sticky wall pouch.

One more thing when you attempt to stick colored paper on the sticky wall - Don't try to press it hard or stamp it hard, gentle press would hold paper on the wall more like magic.

If pressed hard, while removing papers it might leave some portion of the paper on the wall and it would be tricky to remove it later.

If this happens use wet cloth to gently rub it off the wall.

**Please do not use poor quality paper.**

Warm Regards
